WHY THE BA GREENSKEEPER RANGE? FEATURES

Over 35 years of spraying innovation

The Greenskeeper has been designed to ensure your spraying is done easily and efficiently. All our research and development has been performed in close consultation with Turf industry, Greenkeepers, and maintenance staff.

75 LITRE GREENSKEEPER SPRAYER

Shurflo 13.6l/M
12 Volt Pump

Tank Agitation

Tank Lid Strainer

75 Litre Tank

Optional: Foam Marker

Individual Nozzle Shut-Off

Easy Access Suction Filter

Drain Tap

Low drift air induction TeeJet nozzles with 250mm spacing for lower boom height and drift control

50 LITRE GREENSKEEPER SPRAYER

We also offer a compact pedestrian sprayer which includes:

- ✓ A 50 Litre tank
- ✓ 1.5 Metre boom
- ✓ 12 Volt
- ✓ SHURFLO Smoothflo Pump, 6.8 LPM, 107 PSI

GREENSKEEPER FEATURES

CONTROL PANEL

The Greenskeeper has been designed with greenkeepers in mind, it features simple fingertip operation of all the sprayers' controls from the handle bar. The operator can change the optional foam marker while continuing to push or turn the sprayer. The operator is able to adjust spray pressure easily with the pressure regulator and also keep an eye on the spraying pressure at all times with the pressure gauge being clearly visible.

TANK

The Greenskeeper includes a UV resistant 50 and 75 Litre polyethylene tank. The GK75 has a positively draining sump, ensuring there's no leftover product in the tank once drained. The sprayer's pump draws from the sump which helps eliminate the pump sucking air on sloping areas when the tank is low on fluid. The tank is also fitted with a venturi agitator to ensure you will have excellent chemical suspension.

MANOEUVRABILITY

The Greenskeeper has excellent weight distribution with the majority of weight being placed over the front wheels, this gives the operator good control when spraying on sloping terrain. The sprayer also features a rear caster wheel for manoeuvring around obstacles and tight turns on the bowling green. Pushing the sprayer around tight spaces is easy with a narrow travel width with boom folded of only 680mm, allowing access through gateways or maintenance shed doors.

SPRAY BOOM & TEEJET NOZZLES

Low boom height is one of the great features of the Greenskeeper. The combination of a 250mm boom height and 250mm nozzle spacings provide application efficacy and drift control. We use only high quality TeeJet Air-induced or Twin fan nozzles on our sprayers. No matter what application you're using we will ensure you are spraying with the correct nozzle for your needs.

UPGRADE YOUR GREENSKEEPER

WITH SMART-FIT ACCESSORIES

Easily customize your Greenskeeper with our range of modular SMART-FIT accessory designs for quick installation and easy use.

SPRAY GUN KIT

Adding flexibility to your sprayer allowing you to spray areas where the boom is unable to reach.

'SPOT ON' DOUBLE SIDED FOAM MARKER

Save chemical and prevent over spraying by marking where you've sprayed.
